SUBJECT INDEX

acetylcholine release - effect of various substances, 115
acetylcholine release - from synaptosomes, 115
acetylcholinesterase activity - reduced in Wobbler mutant mouse, 425
acetylcholinesterase - content in the CNS, 265
^{14}C-acrylamide - binding to CNS, 191
A_2-adenosine receptor - xanthine amine congener is a ligand, 207
S-adenosyl methionine - effect on α_1-receptors, 39
adenylyl cyclase activity - characterization and distribution, 389
adenylyl cyclase activity - in human brain, 389
α_1-adrenoreceptors - effect of S-adenosyl methionine, 39
α_2-adrenoceptor antagonist - Efaroxan, 137
aluminium chloride - effect on release of taurine and GABA, 125
2-amino-3-phosphonopropionic acid - inhibits metabotrophic excitatory amino acids, 411
ammonia - influence on NAD(P)H, 323
^{3}H-AMPA - binding to synaptic membranes, 75
^{3}H-AMPA - lack of effect of barbiturates on binding, 75
^{3}H-AMPA = [^{3}H]α-amino-3-hydroxy-5-methylisoxazole-4-propionic acid
anoxic stress - effect of diazepam treatment, 107
apamin - neurotoxin mast cell degranulating peptide, 525
arachidonic acid - effect on guanylate cyclase, 131
aromatic acid decarboxylases, 27
astrocytes - release of GABA and taurine, 125
ATP - cytoplasmic levels, 283
ATP - influence on catecholamine synthesis, 283
autoradiography - of 5-HT receptors, 17
autoradiography - of 5-HT_3 receptors, 69
autoradiography - of serotonin receptors, 1
autoradiography - of ^{125}I-endothelin binding, 439
barbiturates - lack of effects on ^{3}H-AMPA binding, 75
benzodiazepine antagonist - Ro15-1788, 405
benzodiazepine antagonist - interaction with GABA, 405
Big-endothelin-1 - bronchopulmonary and pressor effects, 481
binding sites - of ^{3}H-tryptophan, 347
binding - of 5-HT ligands, 331
binding - of endothelin to various tissues of hypertensive rats, 541

binding - of endothelin-1, 507
binding - of ^{125}I-Bolton Hunter substance P, 399
binding - of ^{14}C-acrylamide to CNS, 191
binding - of ^{3}H-endothelin to coronary tissue, 439
binding - of ^{3}H-glutamate, 341
binding - of ^{3}H-xanthine amine congener, 207
^{125}I-Bolton Hunter substance P binding sites - in human brain, 399
B_2-bradykinin receptors - in CNS and peripheral tissues, 89
bradykinin - stimulates phosphoinositide turnover, 419
bronchopulmonary effects - by Big-endothelin-1, 481
bronchopulmonary response - effect of endothelin-1 and phosphoramidon, 477
2,3-butanedione - inactivates binding of [^{35}S]t-butylbicylophosphorothionate, 51
[^{35}S]t-butylbicylophosphorothionate - binding inactivated by 2,3-butanedione, 51
calcium fluxes - by endothelin-2, 575
calcium mobilization - by endothelin-2, 575
calcium - intracellular levels in synaptosomes, 115
[^{3}H](±)-3-(2-carboxypiperazin-4-YL) propyl-1-phosphonate - effect of SH-reactive agents on binding, 55
carotid arteries - occlusion, 175
catecholamine synthesis - in adrenal chromaffin cells, 283
catecholamine synthesis - influence of ATP, 283
cerebrospinal fluid - myelin basic products, 291
cerebrospinal fluid - purine levels, 243
charybdotoxin - neurotoxin mast cell degranulating peptide, 525
chloride uptake - effect of GABA and Ro15-1788, 405
cholesterogenic enzymes, 171
chromaffin cells - catecholamine synthesis, 283
cocaine - and serotonin, 33
cocaine - serotonin uptake, 33
coiled coils - in aromatic acid decarboxylases, 27
damselfly - metabolism of 5-HT, 199
diabetic rat - effect of endothelin-1 an atria, 461
diazapam - effect on GABAergic system, 107
diazepam treatment - effect of anoxic stress, 107
dihydropyridine-sensitive calcium channels - activation induces somatostatin release, 367
down-regulation - of protein kinase C, 419
Efaroxan - selective α_2-antagonist, 137
eicosanoids - role in CNS, 303
endocytosis - cis-platinum-encapsulating liposome, 257

^{125}I-endothelin binding sites - to human coronary tissue, 439
endothelin binding - to various tissues from hypertensive rats, 541
endothelin receptors - two types in arteries, 571
endothelin (16-21) - effect on blood pressure and micturition reflex, 565
endothelin - a neurotoxic factor, 503
endothelin - effect on vascular and non-vascular smooth muscle, 559
endothelin - formation, release, 515
endothelin - involvement of hypoglycemic/ischemic brain injury, 503
endothelin - neurotoxin mast cell degranulating peptide, 525
endothelins - effect on cardiovascular and pulmonary responses, 547
endothelin-1 - binding sites and stimulation of inositol monophosphates, 507
endothelin-1 - effect of intravenous perfusion, 445
endothelin-1 - effect on atria from diabetic rat, 461
endothelin-1 - effect on blood pressure and micturition reflex, 565
endothelin-1 - effect on ear arteries, 465
endothelin-1 - fluorescent studies, 485
endothelin-1 - in pressor response, 553
endothelin-1 - modulates cardiorespiratory control of the CNS, 519
endothelin-1 - modulates ^{3}H-noradrenaline release, 455
endothelin-1 - potentiates the effect of phosphoramidon, 477
endothelin-1 - receptor binding, 535
endothelin-2 - mobilization of intracellular calcium and stimulation of calcium fluxes, 575
endothelin-3 - effect on blood pressure and micturition reflex, 565
endothelin-3 - 'H NMR studies, 491
endothelin-like peptides, 515
endothelium-denuded arteries - effect of endothelin-1, 465
endothelium-intact arteries - effect of endothelin-1, 465
N-ethylmaleimide - effect on 5-HT receptors, 331
excitatory amino acid agonists - effect on phosphoinositide hydrolysis, 411
fluorescent studies - of endothelin-1, 485
GABA release - effect of aluminium chloride, 125
GABA release - from astrocytes, 125
GABA release - from TTX-induced chronic epileptic foci, 373

GABA release - in seizures, 373
GABA uptake - ZAPA a substrate, 63
GABA - ex vivo release, 373
GABA - interaction with benzodiazepine, 405
GABAergic system - effect of diazepam, 107
$GABA_A$ receptor, 405
β-galactoside - amino acid sequence, 275
β-galactoside - lectin in brain, 275
gastrin - competes with somatostatin for binding to 120 kDa protein, 185
^{3}H-glutamate binding - to insect muscle membranes, 341
^{3}H-glutamate binding - to synaptic membranes, 55
^{3}H-glutamate -effect of SH-reactive agents on binding, 55
glutamate uptake - ionic requirements, 43
glutamate - uptake, 43
GTPγS - effect on phosphoinositide metabolism, 381
guanylate cyclase - effects of arachidonic acid and hydroperoxides, 131
G-proteins - associated with neurokinin receptors, 158
hippocampal slices - effect of neurotoxins, 323
hippocampus - neurotransmitter levels, 268
histamine - effect on noradrenaline release, 215
histamine - effect on ornithine decarboxylase activity, 237
histamine - effect on serotonin release, 215
hydroperoxides - effect on guanylate cyclase, 131
5-hydroxytryptamine receptor subtypes, 331
5-hydroxytryptamine receptors - effect of N-ethylmaleimide, 331
5-hydroxytryptamine - metabolism in damselfly, 199
5-HT, see also serotonin
5-HT receptors - autoradiography, 17
$5\text{-}HT_{1A}$ receptors, 2
$5\text{-}HT_{1B}$ receptors, 3
$5\text{-}HT_{1C}$ receptors, 4
$5\text{-}HT_{1D}$ receptors, 6
$5\text{-}HT_1$ receptors - different types, 17
$5\text{-}HT_2$ receptors, 8
$5\text{-}HT_3$ receptors, 9
$5\text{-}HT_3$ receptors - autoradiographic localisation, 69
hyperketonemia - lipid synthesis, 85
hypertensive rats - effect of endothelin-1, 553
hyperthyroidism - lipid synthesis, 85
hypocalcemic rat, 249
hypoglycemic injury - involvement of endothelin, 503
hypoxia - effect on CSF levels of purines, 243

hypoxic conditions - effect on NAD(P)H, 323
in situ hybridization - of ornithine decarboxylase, 347
inositol monophosphates - stimulation by endothelin-1, 507
inositol phosphates - and α_1-receptors, 175
inositol phosphates - effect of carotid artery occlusion, 175
insect muscle - binding of ^{3}H-glutamate, 341
ionic requirements - in glutamate uptake, 43
ischemic injury - involvement of endothelin, 503
ketone bodies - precursors for lipid synthesis, 85
ketone bodies - used in brain during development, 85
lanthanides - effect on acetylcholine release and intracellular calcium levels, 115
α-latrotoxin - effect on acetylcholine release and intracellular calcium levels, 115
lectin - β-galactoside, 275
leucine zippers - in aromatic amino acid decarboxylase, 27
lipid synthesis - from ketone bodies, 85
luteinizing hormone-releasing hormone-like material - in frog CNS, 221
metabotrophic excitatory amino acid receptors - inhibited by 2-amino-3-phosphonopropionic acid, 411
Multiple Sclerosis - myelin basic protein products in CSF, 291
muscle - effect of endothelin and sarafotoxin, 559
myelin basic protein catabolism, 291
myelin basic protein - catabolism, 291
myelin basic protein - in chick brain, 357
myelin - from chick, 357
myogenesis - distribution of N-CAM, 97
NAD(P)H - influence of ammonia, octanoate, quinolinate and hypoxia, 323
NCB-20 cells - down regulation of protein kinase C, 419
neuroblastoma cells, 257
neurokinin receptors, 152
neurotoxic factor - endothelin, 503
neurotoxin mast cell degranulating peptides, 525
neurotoxins - effect on hippocampal slices, 323
neurotransmitter levels - in hippocampus and striatum, 268
neurotransmitters - in vitamin D deficient hypocalcemic rat, 249
^{1}H NMR - of endothelin-3, 491
^{1}H NMR - studies on structure of sarafotoxin-S6b, 471
noradrenaline release - effect of histamine, 215
^{3}H-noradrenaline release - modulated by endothelin-1, 455
normotensive rats - effect of endothelin-1, 553
nucleotides - effect on phosphoinositides, 381

N-CAM expression - modulation, 97
N-CAM - absent in Wobbler mutant mouse, 425
N-CAM - distribution during myogenesis, 97
octanoate - influence on NAD(P)H, 323
ornithine decarboxylase activity - effect of histamine, 237
ornithine decarboxylase mRNA levels, 347
ornithine decarboxylase mRNA levels - in situ hybridization, 347
phenolic derivatives - of phenylalanine, 171
phenylalanine - phenolic derivatives, 171
Phenylketonuria, 171
phorbol esters - effect on protein kinase C, 419
phosphoinositide hydrolysis - effect of excitatory amino acids, 411
phosphoinositide metabolism - effect of GTPγS and nucleotides, 381
phosphoinositide metabolism - in synaptosomes, 381
phosphoinositide pathway - with neurokinin receptors, 158
phosphoinositide turnover - by bradykinin, 419
phosphoramidon - effect on endothelin-1 response, 477
physostigmine-hyoscine pretreatment - neurochemical changes, 265
cis-platinum-encapsulating liposome - uptake by endocytosis in neuroblastoma cells, 257
potassium - effect on acetylcholine release and intracellular calcium levels, 115
pressor effects - by Big-endothelin-1, 481
pressor response - to endothelin-1, 553
proendothelin (1-38) - from humans, 445
proendothelin (1-39) - from porcine, 445
prostaglandins - role in CNS, 303
prostanoids - role in cell-cell interactions, 303
protein kinase C - down regulation, 419
purine concentrations - in CSF after hypoxia, 243
quinolinate - influence on NAD(P)H, 323
receptor binding - of endothelins, 535
receptor types - neurokinin, 152
receptor types - tachykinins, 149
α_1-receptors - and inositol phosphates, 175
receptors - A_2-adenosine type, 207
receptors - serotonin subtypes, 1
receptors - tachykinins, 167
mRNA levels - of ornithine decarboxylase, 347
Ro15-1788 - a benzodiazepine antagonist, 405
sarafotoxin 6b - effect on cardiovascular and pulmonary responses, 547

sarafotoxin - effect on vascular and non-vascular smooth muscle, 559
sarafotoxin-S6b - 'H NMR studies, 471
seizure - release of GABA, 373
serotonin, see also 5-HT or 5-hydroxytryptamine
serotonin receptors - autoradiography, 1
serotonin receptors - different subtypes, 1
serotonin release - effect of histamine, 215
serotonin uptake - effect of cocaine, 33
serotonin - and cocaine, 33
SH-reactive agents - effect on binding of [^{3}H](±)-3-(2-carboxypiperazin-4-YL) propyl-1-phosphonate, 55
SH-reactive agents - effect on ^{3}H-glutamate binding, 55
signalling mechanisms - involvement of tachykinins, 149
soman intoxication, 265
soman - production of neurochemical changes, 265
somatostatin release - involvement of dihydropyridine-sensitive calcium channels, 367
somatostatin - competes with gastrin for binding to 120 kDa protein, 185
striatum - neurotransmitter levels, 270
stroke - myelin basic protein products in CSF, 291
substance P - binding sites, 399
synaptosomes - intracellular calcium levels, 115
synaptosomes - phosphoinositide metabolism, 381
tachykinins - receptor subtypes, 149
tachykinins - receptors, 167
taurine release - effect of aluminium chloride, 125
taurine release - from astrocytes, 125
Tetanus toxin-induced chronic epileptic foci - release of GABA, 373
^{3}H-tryptophan - binding sites in brain, 347
uptake - of glutamate, 43
vitamin D deficient hypocalcemic rat - effect on neurotransmitters, 249
Wobbler mutant mouse - reduced acetylcholinesterase and lack of N-CAM, 425
^{3}H-xanthine amine congener - binding, 207
xanthine amine congener - radioligand for A_2-adenosine receptor, 207
ZAPA - substrate for GABA uptake, 63
ZAPA = Z-3[(aminoiminomethyl)thio]prop-2-enoic acid
(hydroxyproline^9)luteinizing hormone-releasing hormone - a novel peptide, 221
